

# Ultra-high power three-phase inverter

## Overview

---

This three-phase bidirectional buck-boost inverter operates within a DC range of 0-2400 V and an AC range of 0-1000 V. Each unit delivers a maximum current of 100 Arms per phase. Multiple units can be paralleled to reach the megawatt range.

This three-phase bidirectional buck-boost inverter operates within a DC range of 0-2400 V and an AC range of 0-1000 V. Each unit delivers a maximum current of 100 Arms per phase. Multiple units can be paralleled to reach the megawatt range.

The X3-ULTRA offers unparalleled flexibility, supporting up to 10 units in parallel for both on-grid and off-grid systems. With its 36A PV input per MPPT, it supports high-power solar panels. The advanced microgrid and generator functionality further enhance its adaptability, making it an excellent.

Engineered for performance, the PEAK3 delivers unmatched power density in a compact, lightweight design—reducing transportation costs and simplifying installation. Built to excel in extreme environments, the PEAK3 ensures consistent energy yields throughout the lifetime of the PV power plant. Its.

This 300kW three-phase inverter demonstrates best-in-class system-level power density and efficiency obtained by using Wolfspeed's new XM3 power module platform. The XM3 power module platform is optimized for SiC MOSFETs in a high-density; low-inductance footprint; which reduces system-level losses.

This three-phase bidirectional buck-boost inverter operates within a DC range of 0-2400 V and an AC range of 0-1000 V. Each unit delivers a maximum current of 100 Arms per phase. Multiple units can be paralleled to reach the megawatt range. With flexible software control, this inverter can function.

Maximize energy production, safety, and achieve significant savings in Balance of System (BoS) and Operations and Maintenance (O&M) costs with our range of innovative and lightweight three phase inverters country save on energy costs and leave a smaller carbon footprint. Industries include: And.

is the new generation of intelligent PV system monitoring. This new monitoring

platform will empower you like never before. is applied in PV systems to achieve power line communication. Power Line Communication is transmission of data over the AC Wires of the system. is the new generation of.

## Ultra-high power three-phase inverter

### [CRD300DA12E-XM3 300kW Three-Phase Inverter , Wolfspeed](#)

This 300kW three-phase inverter demonstrates best-in-class system-level power density and efficiency obtained by using Wolfspeed's new XM3 power module platform.
