

Vietnam lithium energy storage power supply production plant

Overview

Spanning 22,000 square meters, the modern facility has completed its core infrastructure, marking a significant step forward in Gushine's global supply chain strategy. This development lays a solid foundation for the start of full-scale production. Production Line Setup:.

Spanning 22,000 square meters, the modern facility has completed its core infrastructure, marking a significant step forward in Gushine's global supply chain strategy. This development lays a solid foundation for the start of full-scale production. Production Line Setup:.

Gushine's new battery manufacturing base in Hai Phong, Vietnam, reinforces its global supply chain resilience and expands its global footprint while enhancing localized services. Strategically located between Hanoi and Hai Phong Port, the facility offers efficient access to international logistics.

The original PDP8 approved in 2023 had set out a target of 300MW of BESS capacity by 2030. The revised PDP 8 (approved by the Prime Minister via Decision No. 768/QD-TTg) now targets between 10,000 MW and 16,300 MW of BESS capacity by 2030. This increase reflects Vietnam's commitment to integrating.

The facility represents a US\$20 million investment and spans 13,650 square metres. The project received its investment certificate in July 2023 and was completed within 18 months, including construction, installation, and operational safety preparations. The delegates cut the ribbon at the.

The renovation of Gushine's lithium battery module manufacturing base in Vietnam is set to be fully completed this month. Spanning 22,000 square meters, the modern facility has completed its core infrastructure, marking a significant step forward in Gushine's global supply chain strategy. This.

A green energy subsidiary of Japanese conglomerate Marubeni has brought online a megawatt-scale battery storage demonstration project in Vietnam. Marubeni Green Power Vietnam, a wholly owned subsidiary of Marubeni—one of Japan's largest general trading 'sōgō shōsha' companies—partnered with.

Vietnam's battery market is no longer a quiet corner of Southeast Asia, it is rapidly

becoming the engine room of the region's electrification push. From electric vehicle (EV) rollouts to large-scale energy storage deployments under the Power Development Plan VIII (PDP8), the sector is witnessing.

Vietnam lithium energy storage power supply production plant

Gushine Electronics Officially Inaugurates Hai Phong Lithium ...

With the Hai Phong base operational, Gushine enhances its end-to-end lithium battery solutions--from design and prototyping to mass production--serving global industries.
