

# What is the current price of solar panel installation

## Overview

---

Installing solar panels on your home typically ranges from \$15,000 to \$25,000, depending on system size, location, and equipment. The average cost of a residential solar project falls around \$18,000, though this can rise if you add features like energy storage systems or.

Installing solar panels on your home typically ranges from \$15,000 to \$25,000, depending on system size, location, and equipment. The average cost of a residential solar project falls around \$18,000, though this can rise if you add features like energy storage systems or.

That price effectively drops to \$19,873 after considering the full federal solar tax credit. NOTE: Under the “One Big Beautiful Bill Act” signed in July 2025, the federal solar tax credit is now set to expire at the end of the year, much earlier than previously expected. You must install and pay.

As of 2026, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type.
