GCS type low-voltage withdrawable switchgear was designed and developed in 1995 by the joint design team of GCS switchgear from the Ministry of Electric Power Industry and the Ministry of Machinery Industry, entrusted to Senyuan Electric Co., Ltd. It passed the appraisal of the two ministries in 1996.

A fixed device, whether modular, moulded case (compact), or air circuit breaker (open), is a piece of equipment that must have its connections disconnected in order to be replaced. On the other hand, withdrawable devices are designed so that they can be replaced without the need to disconnect.

Exclusive licensed manufacturer authorized by TAVRIDA ELECTRIC, we manufacture a Compact air insulated withdrawable MV switchgear – Based on vacuum switching technology, air insulation, digital protection, and arc-flash relays which is Type tested according to IEC 62271-200, MILEtype inherently.

The supply, feeder and coupling cubicles of the circuit-breaker are equipped with automated type circuit-breakers in withdrawable or fixed-mounted execution. Due to the large number of consumers (loads) connected, a particular importance is given to ensuring a long-term operation in conditions of.

Circuit breakers play a vital role in electrical switchgear systems, ensuring the protection and control of electrical networks. One of the critical decisions when designing or upgrading switchgear is choosing between fixed and withdrawable circuit breakers. Each type has its advantages and is.
